

## CESANA

Cesana is a leading company in the production of shower enclosures in safety toughened glass. Thanks to a 40 years experience, we can now offer more than 24,000 combinations to complement any bathrooms. To satisfy all requirements, special made-to-measure shower enclosures can also be produced upon request. A full line of accessories is available to complement the Cesana enclosures and add that final touch to your bathroom.

In the continual evolution of lifestyles and habits, the bathroom has become the place in the home where one can capture well-being.

Cesana conceives the bathroom as a system of maximum flexibility, dimensional and aesthetic, to which are added ever more advanced possibilities for achieving daily wellness.

In Cesana's view, the shower enclosure is much more than a mere barrier keeping water in: in addition to provide consistent performance over time, it is a system equipped with functional and technical innovations.

These and other problems linked to water dynamics are resolved concretely and completely in the Cesana collection.
