

## PRESS RELEASE

Fast S.p.A. is one of the leading companies in the production of die-cast and extruded aluminium interior and outdoor furniture, as well as customised contract furnishings.

As can be seen both in the “designer” and “classical” collections, the company is driven by an entrepreneurial philosophy that values quality. A philosophy which is evident in all aspects of production: from the choice of materials, to the attention to finishes and details, from the research and development of innovative solutions, to the study and creation of products that aim to satisfy the ever-increasing demands of the market.

Fast’s extensive expertise in the treatment of non-ferrous metals comes from more than 40 years experience in the field. The continuous research into innovative solutions, and the use of technologically advanced equipment, has resulted in the creation of important, mould-breaking collections which always look modern and appeal to a wide range of clients.

In recent years, thanks to the introduction of the design range, Fast has won an ever larger following, creating collections not only for outdoors, but also custom contract and interior furnishings.

The Forest, Manta, Shark and Easy chair ranges, as well as the latest Radice Quadra , Green Land, and Tonik tables, are testaments to the attention to detail of Fast’s latest designs. Distinctive, innovative pieces of furniture with a minimalist, stylish design.

Fast is a company in continuous evolution.... one which continues to surprise its fans.  
The latest new products from Fast will be unveiled at Host:  
....included are some images.
