

Tecnodeck is a board for an alternative to wood flooring extremely durable, requires no maintenance or surface treatment cleans easily and is therefore ideal for external and internal decking.

Tecnodeck is a fully recyclable product from a production process that uses waste wood, but not the forests of our planet.

Tecnodeck respects the environment 100%, because in addition being made with recycled materials is itself recyclable.

It is also:

- Resistant to weather, fungi and insects
- Resistant to breakage
- Requires no maintenance or oil protection
- Will not splinter
- Resistant to moisture, no rots
- Easy to assemble using tools traditionally used for natural wood manufactures
- Does not contain elements that harm the environment

Widely distributed by 14 companies of the Group Sogimi, Tecnodeck is available in 3 colours (sand, tropical brown, dark grey) and comes in a length of slats at 2.5, 3 or 4 meters, width of 140 mm and height of 25 mm.
