Description of innovation social values

- product category
- formal and functional features
- problems solved by innovation
 - user
 - field of application

Veloform's CityCruisers are state-of-the-art means of human powered transportation for passengers and cargo, combining a striking shape, comfortable design and advanced technical features. The vehicles' main components are a fully recyclable polyethylene cabin, a heavy duty modular steel frame and an advanced, digitally controlled electric propulsion system.

Description of technical features

- operations
- technology

The CityCruiser provides an ecological mobility experience for one driver and two passengers. With electric acceleration aid, business class-like legroom and an ergonomic driver's seat, you will enjoy an entertaining journey, protection from rain or sun, and definitely the best view.
