Nome Prodotto	**No more Gas (NmG) personal electric vehicle**
Progettista	Mike Corbin
Azienda Produttrice	**Myers Motors, LLC**
Campo di attivit	Manufacture and marketing electric vehicles to promote a sustainable transportation system based on electricity as a potentially renewable power source.
Certificazioni	
Azienda distributrice	
Indirizzo	180 South Avenue 44278 Tallmdage, Ohio, USA
Telefono	330-630-3768
Fax	330-630-3758
Indirizzo e-mail	PR@MyersMotors.com
e dell' inviluppo	MyersMotors.com
Descrizione del prodotto	Three wheeled, highway-legal, all electric vehicle. NmG means No More Gas. Is a single-passenger vehicle that has outstanding acceleration, can reach speeds of 70 mph (about 113 km/h) and has a range of 30 miles (50 km) between charges. The company calculates that a driver charged 11 cents per kilowatt will pay about 55 cents for the "fill up" that powers the NmG about 30 miles. The pollution-free NmG can be fully recharged in 6 to 8 hours using a 110-volt outlet and less than half that time using a 220-volt outlet. Upgraded vehicle from front to back, refining and perfecting fit, form, and function for better performance and reliability.
Materiali	Exterior: Fiberglass with foam core - Mechanical and Electronic Components
Dimensioni	Length: 285 cm - Width: 132 cm - Height:145 cm
Tecnologia / Funzionamento	Swing arm improvement; incorporated more reliable and professionally sourced components, including, but not limited to: Zivan charger, controller, DC to DC converter, and machine shop components.
Benefici per l'ambiente	Electric vehicles greatly reduce emissions when compared to internal combustion engine vehicles, even when charged through a coal-burning electricity producer. Electricity produced using renewable resources make electric vehicles completely emissions-free for driving. Single-person highway legal vehicle can also reduce space needed for parking.
Benefici per la persona	Since vehicle emissions have been linked to pulmonary disease, heart disease, and cancer, reducing or eliminating vehicle emissions provides multiple health benefits for everyone. In addition, the NmG's small size can provide traffic congestion relief, further easing the psychological stresses individuals face in a day. Many NmG drivers have fewer expenses associated with parking, ferry use, insurance costs, fuel costs, etc. Over their IC vehicles.
Altri prodotti che seguono criteri di innovazione accessibile e sostenibile per una migliore qualit della vita	A new and improved 2 seat version will be available in 2008. This will have greater range and longer battery life.
