Telefono	+31 10 2447474
Fax	
Indirizzo e-mail	contact@demakersvan.com
e dell' innovazione	www.demakersvan.com
Descrizione del prodotto	An outside lamp drawn from our home surroundings. The gently sweeping Dutch windmills were actually perfect generators of their own. With that in mind, Demakersvan designed this lamp. With every breeze it stores energy, enough to enjoy every summerevening untill forever. Contemporary vs traditional, art vs funcionality. Shaped by its function the big prop spans over one meter on each side. It is a self supporting light source that marks the landscape.
Materiali	- IN DEVELOPMENT -, high end sail fabric, stainless steel, wood
Dimensioni	240x215x38 cm
Tecnologia / Funzionamento	At the moment the company is developing the technology and the and the engineering to create the most efficient light source. The energy could also be a source for other applications (an energy source for the battery of your laptop, mobile phone etc).
Benefici per l'ambiente	Light created by wind energy
Benefici per la persona	An environmental friendly light source without sacrificing aesthetics and atmosphere.
