<p>Description of innovation social values</p> <ul style="list-style-type: none"> - product category - formal and functional features - problems solved by innovation - user - field of application 	<p>Diva is a LED light and music system specifically designed for your iPod or iPhone. It combines multiple functions in one light, compact object, eliminating clutter and stealing the scene no matter where you place it. The anodised, screen printed aluminium jacket makes Diva a mysterious musical instrument, only revealing its many functions when open. But even when closed, it's an FM radio and speaker system for a connected computer, MP3 or CD player. Insert your iPod or iPhone by releasing the retractable docking station drawer. The sound quality is full and rich, thanks to the four, high quality speakers housed in its body.</p> <p>Pressing a button opens the die-cast aluminium lamp arm. Raise this to whatever position is most comfortable to read or to light your workstation. The lamp's cutting edge LED light is warm, highly effective and energy efficient at 4,5W. A digital screen is hidden behind the anodised aluminium, to show the time and all the other information about Diva's various uses and FM stations. An infrared remote control governs every function, including your iPod and the radio. The back of Diva comes with a AUX socket for playing music from MP3 players, CD players, computers, etc.; a USB socket to play music from a flash drive; an audio-out socket to connect to external speakers.</p>
<p>Description of technical features</p> <ul style="list-style-type: none"> - operations - technology 	<p>Polycarbonate injection moulded plastic parts. Anodized, screen printed aluminium jackets. Casted aluminium lamp arm, with a LED source. Retractable docking drawer with iPod/iPhone connector. 4 drivers, 6 Watt per channel. FM radio. Back connectors: USB, Audio in, Audio Out, power cable. Infrared remote control.</p> <p>Structure colours Black, dark gray, white</p> <p>Bulbs 1 x LED Cree® 4,5W Warm white</p>
<p>Dimensions</p>	<p>Base 18.5cm High 37.5 cm</p>
<p>Materials</p>	<p>Injection moulded plastic parts Anodised printed aluminium Casted aluminium LED source</p>
<p>Certifications</p>	<p>See attached .pdf with technical datas</p>
<p>Benefits for environment</p>	<p>Diva is mostly recycled. The use of LED is energy saver</p>
<p>Benefits for human being</p>	<p>Thanks to the use of LED technology we can have the same intensity of light as a normal bulb, but with the use of 4.5W only.</p> <p>Diva is a multifunctional product: different functions in one only product. Light and sound in an exclusive design</p>
